

Incurable Problem-Solver

I am a multi-talented senior design consultant and problem-solver with over a decade in UX&UI design, interaction design, product development, and digital design. Having worked with groups of every size—from scrappy start-ups and small agencies to established companies and technology firms—has enabled me to develop a wide range of skills and a unique flexibility. I relish the opportunity to break down barriers between designers, developers, and end-users with streamlined communication to create better, more compelling experiences.
